

Laughing Stock Scrum Meeting 9

2026-04-07

All members were in attendance!

Yesterday we had a brief check-in in the Discord channel, outlining what everyone's been doing and immediate needs.

The purpose of this meeting was primarily to check in on progress and address concerns.

Aiden will be implementing a login interface.

Ben will be working on implementing tipping and implementing the driver branch of logic.

Daniel has completed his assigned workload.

Tom will implement the order logic as well as the user logic branch for frontend.

Tomorrow we will meet again at 2PM (EME 1164 booked) to work on the presentation and report.
